REPORT DATE October 3, 1999	COLORADO BUREAU OF INVESTIGATION REPORT OF INVESTIGATION	FILE P99-0453 D99-1333
TYPE OF REPORT Crime Scene	REPORT BY Agent Barie W. Goetz, Team Leader	AREA Jefferson County
NATURE OF CASE Homicide		

CRIME SCENE REPORT FOR TEAM ONE

REQUESTING AGENCY: Jefferson County Sheriff's Office, 200 Jefferson County Parkway, Golden, CO 80401, 303-271-5600

REQUESTING OFFICER: Lab Supervisor Chris Andrist

INVESTIGATING OFFICER: Lab Supervisor Chris Andrist

DATE OF REQUEST: April 20, 1999

DATE OF OFFENSE: April 20, 1999

AGENCY CASE NUMBER: 99-7625

LOCATION OF SCENE: Columbine High School, 6201 South Pierce, Jefferson County Colorado

VICTIMS:
(Deceased)

Lauren Townsend	DOB: (011781)
Kelly Fleming	DOB: (010683)
John Tomlin	DOB: (090182)
Corey Depooter	DOB: (030382)
Daniel Mauser	DOB: (062583)

SUSPECTS:

Dylan Klebold	DOB: (091181)
Eric Harris	DOB: (040981)

WEATHER CONDITIONS: Varied

EVIDENCE SEIZED BY: Chris Loptien, Jefferson County Sheriff's Office

EVIDENCE IN CUSTODY OF: Jefferson County Sheriff's Office

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 2
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

REMARKS:

On April 20, 1999, crime scene personnel from various law enforcement agencies were assigned to assist with the processing of a crime scene at Columbine High School, located in Jefferson County, Colorado.

Upon arrival at the Command Post located on Pierce Street by Clement Park, crime scene personnel were informed that the bomb squads of various agencies were in the process of clearing the school and the parking lot of explosive devices. At approximately 11:30 p.m., all crime scene personnel were instructed that processing of the scene would not start until the bomb squads had completed their activities; therefore, all crime scene personnel would report back to the command post on Wednesday, April 21, 1999 at 8:00 a.m.

ACTION TAKEN:

At 11:45 a.m. on April 21, 1999, Chris Andrist of the Jefferson County Sheriff's Office conducted a briefing for crime scene personnel. A plan was presented to divide the crime scene into specific areas and assign a team of four or five crime scene personnel to each area. A team leader was designated for each team.

Team One personnel consisted of :
 Barie Goetz, Colorado Bureau of Investigation
 Ted Ritter, Colorado Bureau of Investigation
 Tom Adair, Arapahoe County Sheriff's Office
 Chris Loptien, Jefferson County Sheriff's Office
 Donald Sollars, Colorado Bureau of Investigation

Team One was assigned the eastern half of the school library, which included victims numbered 1 through 5. In addition, Team One was later assigned the northwest library offices, hallway and the emergency exit door in that area.

At approximately 1:39 p.m., April 21, 1999, members of Team One were escorted through the crime scene portion of the school for orientation purposes. At approximately 2:05 p.m., team members initiated processing of the school library. The main emphasis of processing for the day was evidence documentation and collection to facilitate body recovery.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 3
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

Duties assignments of Team One were:

Barie Goetz - bloodstain pattern interpretation, coordinator of the team.

Ted Ritter - photography, firearm evidence recognition

Tom Adair - measurements, crime scene sketching

Chris Loptien - evidence collection, evidence log

Donald Sollars - photography log

All team members were assigned the task of evidence recognition and the marking of its location with a green placard evidence marker. Numbers 600 through 899 were assigned to Team One for identifying evidence.

The main part of the school library consisted of an entryway on the northeast, staff counter and workspace on the north, student study areas with tables and chairs on the south, and computer tables on the northwest.

Secondary areas of the library consisted of storage and staff rooms to the north of the main library and offices and hallway in the northwest area. The student study area was physically divided into three sections by the placement of bookshelves oriented north-to-south.

Bookshelf Row 1 was attached to the east wall. Rows 2, 3, and 4 separated the east student section from the middle student section. Rows 5 and 6 separated the middle section from the southwest section. The east section of the student study area consisted of six tables, labeled Table 1 through Table 6 with accompanying chairs labeled 1A, 1B, etc. Three of the victims, #1, #2 and #3, were located in this section. The middle section of the student area consisted of eight tables, labeled Table 7 through Table 14, with accompanying chairs labeled 7A, 7B, etc. Two of the victims, #4 and #5, were located in this middle section. The west section was designated as part of the area processed by Team Two and its description is included in their report.

The Federal Bureau of Investigation Special Projects Team was present to prepare a detailed diagram of the entire school and surrounding areas. The Arapahoe County Sheriff's Office representatives on Teams One and Two have generated a detailed diagram of the library with the location of all physical features of the area and all items of evidence. Therefore, measurements concerning the location of evidence, bullet holes, tables, chairs, walls, windows, desks, etc. will not be included in the narrative of this report.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 4
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

All items of evidence were assigned a number, photographed in place, measured for final location in sketch, and then collected in a suitable container and marked with the case number, item number, date, time, location, description, and the initials of the collector. The Jefferson County Sheriff's Office has generated a detailed list of evidence for the entire school and area; therefore, a detailed list of the evidence collected by Team One is not included in the narrative of this report.

Prior to collection of evidence, overall photographs were taken of the library entrance, main staff counter, student area, and bodies of the deceased.

Processing was initiated in the entryway. Evidence items consisting of spent cartridge cases and firearm projectiles were located and collected from this area. The entryway was then utilized as a staging area for equipment and personnel.

The area leading up to Table 2 in the east section of the student study area was processed for obvious items of evidence. Apparent bullet holes were present in the carpet under and surrounding Table 2.

Victim #1, later identified as LAUREN TOWNSEND, was found lying on her left side, bent at the waist, head to the north, feet to the east, under the northwest corner of the table. She was dressed in a blue top, denim pants and dark boots. Multiple bullet holes were noted in the back of the shirt. Bloodstains associated with the upper two holes were consistent with drainage of blood while the body was positioned as found. Minimal drainage was present around the two lower holes. Concentrated drainage of blood was present under the left arm. A linear blood drainage stain was present in the rectal area. Bullet holes were present in the right thigh area with surrounding blood drainage stains consistent with the position of the body as found. Transfer bloodstains were present on the lower legs and on the sides and bottom of the boots. These bloodstains were not associated with injuries to the victim. Bloodstains on the carpet indicated that the legs of the victim were moved to the east through wet bloodstains to their position as found. The position of Table 2 and the surrounding chairs were marked on the carpet and then moved to view the body. Additional bullet holes were noted in the front crotch area when the body

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 5
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

was moved. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the victim. A bloodstained shirt was present under Table 2 to the south of victim #1. Medical treatment type packages and bandages were present in this area. Bloodstain patterns on the carpet and on the vertical supports of Table 2 along with the shirt and bandages indicated that multiple injured individuals were present at some time under the table and then moved from the scene.

Victim #2, later identified as KELLY FLEMING, was found lying on the floor in a prone position to the southeast of Table 2. She was dressed in a black shirt, denim pants and black/white tennis shoes. An entry wound consistent with a shotgun discharge was present in the lower left back of the body. The plastic shotgun cup/wad was present in the wound tract. Several associated pellet holes were present adjacent to the main entry wound. Drainage of blood from the wound was minimal and consistent with the position of the body as found. Drainage of blood from the nose/mouth area was consistent with the position of the body as found. No other bloodstains were present on the body. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Victim #3, later identified as JOHN TOMLIN, was found lying on the floor in a prone position to the southeast of Table 6. He was dressed in a dark T-shirt, denim pants, and white/black tennis shoes. Numerous wood fragments and pieces of foam padding were dispersed in the area of the body. Drainage of blood from the right side of the head was consistent with the position of the body as found. A large pool of blood was present on the carpet extending to the west of the victim's head area and under the victim's chest and right arm. The victim's eyeglasses were present under the lower portion of the face. No bloodstains were noted on the pants or shoes of the victim. No impact blood spatter was noted in the area. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 6
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

Victim #4, later identified as COREY DEPOOTER, was found lying on the floor in a prone position to the west of Table 14. He was dressed in a gray shirt, denim pants, and brown leather boots. A large concentrated bloodstain consistent with drainage from the rear of the neck and the upper chest was found under the body. This pooling of blood continued onto the carpet to the west of the body. A large concentrated transfer bloodstain was present on the lower back area of the clothing and body. No wounds were present in this area of the body. The bloodstain originated on the exterior of the outer shirt, soaked through to the thermal undershirt and onto the skin of the victim. A strap from the victim's backpack was present under the left arm of the victim and the backpack was found to the west of the body. The bottom of the backpack was heavily blood soaked. No corresponding stain was present on the carpet under the position of the backpack as found. A pattern in the pooled blood to the west of the body was consistent with the size and shape of the backpack bottom. The bloodstain patterns were consistent with the backpack initially lying in the pool of blood from the victim; the backpack being moved to the small of the back of the victim; and then moved to the floor to the west of the body. Photographs were taken of the position of the body, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Victim #5, later identified as DANIEL MAUSER, was found lying on his right side under Table 9 in the middle section. He was dressed in a tan shirt, denim pants, and black/gray tennis shoes. His right arm extended to the south and the wrist area was positioned on top of the right rear stile of Chair 9E. The chair was found lying on its back to the south of the victim. An injury to the fingers of the right hand was present and a small pool of dripped blood was found under the position of the hand. A concentrated pool of blood was present under the head, neck and shoulder area of the victim. Eyeglasses were found under the head of the victim, partially on the upper face. Chair 9E had a bullet path through the chair, entry in the seat cushion and exit in the front upper wooden rail. Wood fragments were dispersed over the body. A number of wood fragments were embedded into the right forearm of the victim. An injury to the right ear was noted upon repositioning of the body prior to transport.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 7
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

Photographs were taken of the position of the body, the position of the chair as found, the bloodstains present on the body, and the bloodstains on the carpet surrounding the body.

Removal of bodies by coroner investigators from various agencies commenced at approximately 5:30 p.m. and was completed by 9:06 p.m.

On Thursday, Friday, Monday, Tuesday and Wednesday, April 22, 23, 26, 27 and 28, 1999 respectively, members of Team One returned to the library to continue documenting and collecting evidence. On Wednesday, April 28, 1999, Dr. Bodelson, Jefferson County Coroner, and the five pathologists who conducted the autopsies, Dr. Michael Dobersen, Dr. Ben Galloway, Dr. Thomas Henry, Dr. John Meyer and Dr. Jim Wahe, briefed the members of Team One on the preliminary results of the autopsies. Their findings are included in the narrative part of this report as they pertain to each victim.

The students' backpacks were examined for items to demonstrate the ownership. Materials remaining on the tables were similarly examined. After verification of the owner by identification cards or a multiple of other items, the student's name was printed on a section of tape and affixed to the table in the approximate location as his/her belongings were found. Backpacks and other items identified as belonging to one of the deceased victims were collected as items of evidence. The film was removed from a camera (item #737) found on top of Table 3 and collected as evidence. A disposable type camera from the top of a table in the middle student study area was collected as evidence.

Table 1, the first table on the right as the east section is viewed from the entryway, contained materials belonging to Mark Kintgen on the southwest corner and Jen Doyle on the northeast corner. Reports listed Mark Kintgen as having gunshot injuries to the head and neck. A pool of blood and eyeglasses were located under the southwest corner of Table 1. Chair 1A was located across from the table position of Kintgen's belongings. It was found facing south and positioned almost all the way under the table. It contained a shotgun discharge hole in the backrest with the entry on the north side and exit on the south side; pellet holes were present in the seat portion. A blood

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 8
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

transfer was found on the cross brace (stretcher) of the chair above the blood pool. The longitudinal cross brace under the table directly in front of Chair 1A contained shotgun pellet damage and one pellet was imbedded in this area. Chair 1E was located to the east of Kintgen's belongings and it contained a bullet strike in the southwest leg. Chair 1F was located to the south of Kintgen's belongings on Table 1 and it contained bullet strikes to the rear upper rail and the right rear leg. A blood transfer was present across the top of the backrest of Chair 1F. A bullet strike was found on the exterior surface of the north support of Table 3. No other projectile strike marks were found on Table 3. Trajectory of the shotgun blast to the backrest of Chair 1A aligned with the damage to the seat cushion, cross member of the table, bullet damage to opposing chairs and the eyeglasses and bloodstain under the table.

Preliminary autopsy results from Dr. Dobersen on LAUREN TOWNSEND indicated that both shotgun pellets and 9mm bullets were recovered. The numerous wounds and their locations indicated that the body had been shot in more than one position. Several rounds had exited the body.

Autopsy results from Dr. Dobersen on KELLY FLEMING indicated a single shotgun blast entered the lower left back, traveled straight upward, and the pellets were contained in the upper left back area. The acute angle of travel through the body indicated that the victim was in a prone or near prone position when shot.

Concentrated, congealed bloodstains were found projected onto the exterior vertical surface of the east support of Table 1. The stains range from 29" to 6" from the floor. Chair 1C also contained a concentrated, congealed, projected bloodstain on the left middle rail, 8.5" from the floor. The table support and left side of the chair were exposed to the area under Table 2.

The area under and surrounding Table 2 contained numerous bloodstain patterns. Concentrated pooling of blood was found on the carpet in the southeast area under the head of FLEMING. A large transfer bloodstain was found on the interior surface of the south table support. This stain covered an area 11" high by 12" wide. A concentrated bloodstain was found on the carpet

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 9
-------------------------------	-------------------------	------------------	-------------------------------------	-----------

directly below this stain. Concentrated pooling of blood was found on the carpet to the north of this area. Concentrated pooling, dripping, and transfer bloodstains were found on the carpet to the southwest of Table 2. A bloodstained shirt and emergency medical supplies were found to the north of this area. Concentrated pooling of blood with associated spatter was found on the carpet at the base of the north support of Table 3. No bloodstains were found on the remainder of Table 3. Concentrated pooling, dripping, and transfer bloodstains were found on the carpet to the northeast of the table. A drip pattern extended to the north of the table. The bloodstain patterns associated with Table 2 were in excess of what would be expected from the injuries to TOWNSEND and FLEMING. Patterns indicated that individuals were injured under Table 2 and then were transported or moved away from the area. Personal belongings of Jessica Lea Holliday, Lisa Michelle Kreutz, and Jeanna Park were found on the east side of the table. Personal belongings of Diwata Perez and LAUREN TOWNSEND were found on the west side. Personal belongings of Val Schnurr and possibly from a Susan Peters were present on a small table to the northeast of Table 2. Personal belongings of Heather Jackson and Patti Blair were found on Table 3.

Chairs 2A and 2B were found to the north of Table 2. Chair 2A was facing to the northwest; Chair 2B was facing to the southeast. 2A had two bullet entry holes in the seat cushion, one exited the bottom of the chair, and the other one exited the top rail on the right side. Bloodspatter was present on the chair; however, no corresponding patterns were present in the surrounding area. Wood splinters from the chair were found under Table 2. Chair 2B had blood smears on the lower front left leg and on the seat cushion; however, no corresponding patterns were present in the surrounding area. A bullet impact site was present on the rear right leg. The physical evidence found on the chairs indicated that they were originally positioned to the sides of Table 2 and then moved to the positions as found.

Pellet impact sites were present on the interior surface of the north support of Table 2. One pellet penetrated the veneer surface and projected a section of wood from the exterior surface onto the carpet north of the table. This pellet was imbedded in the wood. The trajectory of the pellets indicated that the pellets originated from the

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 10
-------------------------------	-------------------------	------------------	-------------------------------------	------------

southeast and traveled under the table and struck the interior of the north support. Pellet wounds to TOWNSEND corresponded with this trajectory. Bullet impact sites in the carpet under and around the table were aligned both north-south and east-west. Examination of the exterior surface of the south support of Table 2 did not reveal any bullet strike marks or bloodstains.

Personal items identified as FLEMING's were found on and under the northeast corner of Table 4. The corresponding chair was moved back from the table. Examination of Table 4 and the six chairs associated with it did not reveal any bloodstains or bullet impact sites. No other person's belongings were found on Table 4.

The north end of Table 6 contained a bloodstain pattern consistent with expired/aspirated blood. The origin of the bloodstains was determined to be approximately 51" above the surface of the floor, 43" from the east baseboard, and 19'6" from the south wall. The north side of Chair 6B also contained fine droplets of blood consistent with the source of bloodstains on Table 6. A linear pattern of small blood droplets was also found on the surface of Table 5 leading up to the position of a bloodstained multifunction tool. The tool was configured into the pliers position. No other bloodstains were found on Tables 5 and 6. Personal belongings of Nicole Nowlen were found on Table 5. Personal belongings of TOMLIN were found on Table 6.

The carpeted area to the southeast of Table 6 contained four bullet impact sites. The trajectories were parallel and were aligned in an east-west orientation consistent with an origin south of Table 5. A jacketed bullet was recovered from one of the carpet strike points. The lower left side of Chair 6D contained two bullet impact sites. The east bookshelf baseboard trim behind Chair 6D also contained a bullet strike. A dowel rod was inserted through the holes in the chair and aligned with the impact site on the baseboard. The convex mirror positioned on a support on the south wall contained a single bullet hole through the mirror and into the wall. A dowel rod was inserted through the mirror holes and into the wall hole to approximate the trajectory. The trajectories of the bullet paths through the mirror and the bullet hole through Chair 6D intersected at a location south of Table 5. Agent

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 11
-------------------------------	-------------------------	------------------	-------------------------------------	------------

Goetz held a dowel rod in each hand and approximated the intersection of the trajectories to demonstrate a possible common origin. This area was 9' from the south wall and 14' from the east baseboard. Photographs were taken of the damage to the mirror, baseboard, carpet, Chair 6D, and of the dowel rod trajectories.

Chair 5G contained a shotgun blast through the backrest portion. The entrance was to the rear of the seat back. Additional damage was noted on the upper portion of the front left leg. Debris from the chair was found under and to the east and south of Table 6. Pellets were found to the east of Table 6. Chairs 6A and 6E also contained impact sites. The evidence was consistent with Chair 5G being originally positioned along the west side of Table 6 when a shotgun blast originated from the area north of Table 5. A dowel rod was inserted through the hole to approximate the trajectory. Photographs were taken of the damage, indicated original position, and dowel rod trajectory. As reported above, TOMLIN was found on the floor to the east of Table 6. Preliminary autopsy results by Dr. Thomas Henry indicated three projectiles had entered the right side of the head/neck area and exited the left side. Additional injuries to the torso were consistent with shotgun pellets.

As reported above, MAUSER was found lying under Table 9 in the middle student section with Chair 9E lying to his south. Preliminary autopsy results from Dr. Galloway indicated three wounds. The right hand had two defects present. A bullet graze injury was present on the right ear, and the fatal injury was due to a single bullet that entered the nose and exited the back. Bloodstains on the carpet between Table 1 of the east section and the location of MAUSER indicated an individual with a bleeding injury or injuries traveled from the area of Table 1 toward the west and Table 9. Bloodstains on the rows of bookshelves in this area were found where a person with an injury to the right hand would have touched as he or she moved to the west. The arrangement of chairs to the south of Table 1 indicated an individual in addition to Mark Kington was seated on the south side of Table 1.

A dowel rod was used to demonstrate the trajectory of the bullet hole through Chair 9E. The chair was originally found lying on its back; however, the trajectory through the chair was not feasible with that position. With the

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 12
-------------------------------	-------------------------	------------------	-------------------------------------	------------

chair upright on its legs and placed to the south of Table 9, the trajectory of the bullet and a bullet strike mark in the carpet indicated a common area of origin. Photographs were taken of Agent Goetz standing in various locations south of Table 9 holding a dowel rod to simulate a weapon.

As reported above, DEPOOTER was found under Table 14. Preliminary autopsy results from Dr. Jim Wahe indicated three injuries. A single bullet entered the left arm, continued through and entered the left chest, and exited the back of the neck. A second single bullet entered the upper back leaving an atypical entrance hole and lodged in the left chest. A third single bullet entered the back and lodged in the left chest. Three bullet strike marks were found in the carpet under Table 14. Two were aligned east-to-west and one was aligned south-to-north.

Bloodstains were collected from various areas for possible future comparison to injured or deceased individuals. A sample of the pooled bloodstain from under the east end of Table 1 was collected for comparison to the blood of KINGTON. A sample of the bloodspatter from the top of Table 6 and a sample of the droplets from the top of Table 5 were collected for comparison to the bloods of HARRIS and KLEBOLD. Samples of five different bloodstains from the carpet in the area of Table 2 and a sample of the blood from the side of Table 1 were collected for comparison to blood standards of TOWNSEND, FLEMING and the injured individuals who were shot while under Table 2. A sample of the blood from the carpet between bookshelf Rows 2 & 3 and a sample of the transfer stain on a vertical surface of bookshelf Row 4 were collected for comparison to the blood standard of MAUSER. Samples of the pooled blood from under the positions of victims TOWNSEND, FLEMING, TOMLIN, DEPOOTER, and MAUSER were collected as substitute standards of the victims' bloods.

Paper debris was present in the middle student section at the base of bookshelf Row 5. The color and texture of the paper pieces matched the large debris field found between Rows 5 and 6.

A bullet hole was found in the south wall above the third window from the east. A large caliber projectile was collected from this location. The apparent general

JC-001-012257

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 13
-------------------------------	-------------------------	------------------	-------------------------------------	------------

trajectory was consistent with having originated from the window area of the west wall of the library.

An exit bullet hole through an art display on the east wall of the student section was determined to be a continuation of an entrance bullet hole in the west wall of the hallway outside the library. The bullet continued upward into the ceiling of the east section of the library where it ricocheted off of the concrete roof supports and came to rest on the upper surface of the ceiling tile above Table 14. The trajectory of the various paths through the wall and ceiling indicated an origin on the stairs landing leading to the cafeteria.

The center student study section contained eight tables numbered 7 through 14 as depicted on the crime scene diagram. Table 7, the first table on the left as viewed from the north, contained personal belongings of Aaron Welsh. Table 8, the first table on the right as viewed from the north, contained personal belongings of Aaron Cohn, Byron Kirkland, Joshua Lapp, Megan Coxey, Craig Scott, and Brittany Bollerud. A backpack belonging to MAUSER was found on the floor next to Table 9. Table 10 contained personal belongings of Sara Houy and Crystal Woodman. Table 11 contained belongings of John Savage. Table 12 contained personal belongings of Lindsay Elmore and Rebecca Parker. Table 13 contained belongings of Athena Lagos. Table 14 contained belongings of Peter Ball and DEPOOTER. A backpack with items labeled Austin Eubanks was found on a chair along the south wall.

On April 22, 1999 Team One was assigned to process and document the hallway, five offices, conference room, and emergency exit of the northwest corner of the library, as well as the staff service area at the north end of the main library. The area was documented through sketches. Placards were mounted to the walls outside each office designating the offices as "LMC-1", "LMC-2", "LMC-3", "LMC-4", and "LMC-5". The rest of the area was comprised of a conference room, designated as Office #2 in photographs, and a hallway. The following observations were made in each room or hallway. See sketch for measurements of items and bullet holes. Bullet holes were given an alphanumeric designation (for example, BH-1). All entry doors were on the east side of each office.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 14
-------------------------------	-------------------------	------------------	-------------------------------------	------------

LMC-1 was the southernmost office. The office door was closed and locked upon arrival on scene. The office had a long desk that ran the length of the south and west walls. Bookshelves took up much of the space on the north wall. There were windows on the south and west walls of the office. No evidence was located in office LMC-1.

LMC-2 was directly north of LMC-1 and had two windows along the west wall. The office door was closed and locked upon arrival on scene. A rectangular wooden table and four chairs were in the center of the room. A small computer table was against the east wall to the south of the office entry door. A small book cart on casters was against the north wall just west of the entry. There was no evidence located in LMC-2.

LMC-3 was directly north of LMC-2 and had one window along the west wall. The office door was closed and locked upon arrival on scene. A long worktable was attached to the south wall. A chair and a file cabinet were located in the southwest corner of the room. A row of staggered bookshelves was attached to the north wall west of the entry door. An apparent bullet impact defect was observed in the north wall above the door. A bullet fragment (item #763) was recovered from that location (corresponded to BH-6 in LMC-4).

LMC-4 was directly north of LMC-3 and had one window on the west wall. A small table with a television on it was located in the northwest corner of the office. There was a rectangular wooden conference table and six chairs in the center of the room. There was loose wallboard debris over the top of the table. The debris appeared to have come from three bullets that penetrated the north wall of the office, passed over the table, and entered the south wall of the office. The south wall of the office contained three bullet holes given the designations BH-4, BH-5, and BH-6. A bullet fragment (item #761) was recovered from the hole designated BH-4 (corresponded to BH-1 in LMC-4). Another bullet fragment (item #762) was recovered from the hole designated BH-5 (corresponded to BH-3 in LMC-4). The bullet fragment forming BH-6 was actually recovered from the north wall, adjoining LMC-3.

The north wall of the office also contained three apparent bullet holes designated BH-1, BH-2, and BH-3. There were no bullet fragments located in these holes.

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 15
-------------------------------	-------------------------	------------------	-------------------------------------	------------

LMC-5 was the northernmost office in the northwest library hallway. LMC-5 had one window on the west wall and one on the north wall. A small wooden table, black metal audio-visual cart, and chair were located against the south wall of the office. A green metal audio-visual cart was against the east wall directly south of the entrance.

There were seven apparent bullet holes in the south wall of LMC-5. The holes were labeled BH-6 (corresponded to BH-1 in LMC-4), BH-7, BH-8 (corresponded to BH-3 in LMC-4), BH-9 (corresponded to BH-2 in LMC-4), and BH-10. BH-7 contained the copper jacketing associated with lead fragment item #761. BH-10 contained two copper jackets (one associated with item #762) and one lead bullet fragment (item #767). There were also numerous secondary missile impact sites in the area of BH-10 consistent with small glass fragments projected towards the wall, with the bullet fragments, from the north window.

The window on the north wall had five bullet holes through it (three through the glass, two through the frame). No bullet fragments were located in these five holes. The holes were labeled BH-1 (corresponded to item #764), BH-2 (corresponded to BH-6 and BH-7), BH-3 (corresponded to BH-10), BH-4 (corresponded to BH-8 and BH-10), and BH-5 (corresponded to BH-9). It was determined through glass fracture analysis that the sequence for the bullet holes in the north window glass of LMC-5 was as follows:

1. BH-2
2. BH-3
3. BH-4

The following chart explains bullet hole correspondence for LMC-5 through LMC-3 going from north-to-south:

Ext.	LMC-5 North	LMC-5 South	LMC-4 North	LMC-4 South	LMC-3 North
BH-1	BH-1	ON FLOOR (#764)			
BH-2	BH-2	BH-6/BH-7	BH-1	BH-4	IN WALL (#761)
BH-3	BH-3	BH-10			
BH-4	BH-4	BH-8/BH-10	BH-3	BH-5	IN WALL (#762)
BH-5	BH-5	BH-9	BH-2	BH-6	IN WALL (#763)

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 16
-------------------------------	-------------------------	------------------	-------------------------------------	------------

The five bullet holes in the north window and frame of LMC-5 were also documented from the exterior north library wall. In addition, two bullet impact sites were located in the north wall between the north window of LMC-5 and the emergency exit door at the north end of the library hallway.

There were several bullet impact sites in the hallway at the northwest corner of the library. All of the bullet trajectories were traveling south. A wooden twenty-drawer map storage cabinet, located against the east hallway wall, had three bullet impact holes on the north side of the cabinet. Two of the bullets (BH-1 and BH-3) were recovered inside the cabinet. One bullet (item #757) was embedded in the wood of the south edge of drawer #10 from the top and was facing south. One bullet (item #755) traveled through the map cabinet (BH-2 to BH-4), exited the map cabinet then entered the rear of the television cabinet to the south of the map cabinet. Upon making contact with the front frame of the television on the west side, the bullet made a dramatic turn to the east and exited between the plastic face and glass screen of the television set. The bullet then traveled east and struck the east wall. The bullet was recovered from the floor beneath the television cart. Wallboard material was observed on the nose of the bullet at the time of collection.

At the south end of the hallway, on the east wall separating the hallway from the conference room, there were several bullet impact sites. One bullet impacted the upper northern frame of a chair (CH1) along the east wall. The bullet impact (designated impact #1) sent smaller pieces of metal across the wall and through a picture frame on the east wall at the south end. A second bullet impact (designated impact #2) struck the wallboard to the south of CH1 and impacted below the computer table. Team Two recovered that bullet. The third bullet impact (designated impact #3) struck the wood corner molding at the south end of the east wall. The projectile then traveled south and hit a Macintosh computer monitor on the computer table. All three impact sites were tested with sodium rhodizinate with positive results for lead. A fourth projectile also passed through the lower back (south) partition under the computer table and was designated projectile hole #1A by Team Two. A minimum of 15 projectiles was determined to have been fired from

Type of Report Crime Scene	Agent Barie W. Goetz	Date 10/03/99	File Number P99-0453 D99-1333	Page 17
-------------------------------	-------------------------	------------------	-------------------------------------	------------

the north end of the library, down through the northwest hallway and offices towards the south.

The conference room was located on the southeast end of the hallway and directly west of the library magazine storage room. The conference room consisted of a large wood top conference table, surrounded by six padded chairs, in the center of the room. A small table was to the west of the entrance along the north wall of the conference room. A large paper writing pad on an easel was located in the southeast corner of the room. There was a bullet hole in the north wall of the conference room on the west edge of the doorframe. The trajectory of the bullet was traveling south into the conference room. As the bullet passed through the wall it fragmented. Several copper and lead fragments were found on the floor, tabletop, chairs (Chairs "A" and "D") and the south wall. A bullet hole was located in the floor molding of the south wall. The largest of the lead fragments (item #752) was located in the south wall under the easel. An apparent bullet wipe was found on the conference room floor in the southeast quadrant of the room. The wipe was in line with the bullet hole impact area on the floor molding. The area tested positive for lead with sodium rhodizinate.

The magazine storage room was located directly east of the library conference room. Entry into the room could be gained by either the conference room or the staff service area. The room was comprised of two rows of magazine stacks as well as shelving on the south and west walls. No evidence was located in this room. Both doors were open and unlocked upon arrival.

The staff service area was located at the northern end of the main library. The area was comprised of a large wood countertop work area. There were two computer terminals centered in the service counter, which faced south. Inspection of the area revealed that an under-the-counter telephone (presumably for staff use) was off the hook with the receiver on the floor behind the counter. One of the blue cushioned bar stool style chairs from the computer terminal area had apparent bullet hole damage to it. The chair was found on top of the counter to the east of the easternmost computer terminal. The computer monitor was off center of the CPU to the west and had scuffs on the front of it indicating that the chair had been thrown onto the counter striking the computer

monitor.

A small rectangular wooden printer stand cabinet was located at the northwest end of the staff service counter. The cabinet was open to the east and 100 sheet packs of white (8 1/2"x11") printer paper were stored under the counter on the staff (east) side. A computer printer (HP Laser Jet 5si/mx) was essentially centered on top of the cabinet. There were at least 14 shotgun pellet impact sites on the wood frame of the cabinet, some caused by ricocheted pellets. At least three pellets also struck the east side of the upper northwest paper bundle (item #735). No on-site examination or extraction of pellets was performed. One pellet (item #699) was recovered from the lower paper tray of the HP printer east side. Five other pellet impact sites were located on the west side wall of the westernmost staff seating area (access panel location) directly south of the printer cabinet. Additional items of evidence were recovered from the floor and countertop areas of the staff service section (see evidence report).
